DETAILED ACTION

1. Applicant's election without traverse of Group I, claims 1-26 and 28-33, in the reply filed on September 17, 2004, is acknowledged.

- 2. The abstract of the disclosure is objected to because legal phraseologies, such as "said"/"means", should not be used. Correction is required. See MPEP § 608.01(b).
- 3. In claims 1 and 28, line 2, "of the kind" should be deleted because it is not clear as to what structures are covered under the instant claimed kind.
- 4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 7, 13 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Wike (US 5,918,546).

Wike discloses a linear steering truck apparatus having all the features recited in the instant claims, including means for performing car body steering; wherein, the geometries of pivot points in the forms of a parallelogram and a trapezoid are shown in Figure 28 of Wike.

6. Claims 28-29 and 32-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Stucki (US 817,406).

Stucki discloses a truck apparatus having all the features as recited in the instant claims, including side bearings, as shown in Figure 3 of Stucki, that are arranged as claimed.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wike (US 5,918,546).

Wike is applied above.

High strength ferrous castings are common in the making railway truck components (Official Notice is taken). In view of Wike, it would have been obvious to one skilled in the art to cast the bolster and pedestal of Wike with a high strength ferrous material so as to achieve the expected high strength thereof.

As to the instant claimed lost foam process, note that a process of making is generally not patentably significant in an apparatus claim.

9. Claims 30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stucki (US 817,406).

Stucki is applied above.

High strength ferrous castings are common in making railway truck components (Official Notice is taken). In view of Stucki, it would have been obvious to one skilled in the art to cast the bolster and pedestal of Stucki with a high strength ferrous material so as to achieve the expected high strength thereof.

As to the instant claimed lost foam process, note that a process of making is generally not patentably significant in an apparatus claim.

10. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wike (US 5,918,546) in view of Stucki (US 817,406).

Wike is applied above.

Regarding the instant claimed side bearings, as recited in instant claims 2-4, note for example, the side bearings of Stucki. It would have been obvious to one skilled in the art to provide side bearings, e.g. similar to that taught by Stucki, in the railway truck of Wike for enhancing load distributions and facilitating pivotal movement of the car truck relative to the car body.

11. Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wike (US 5,918,546) in view of Mulcahy (US 4,413,569).

Wike is applied above.

Regarding the instant claimed means for maintaining full brake shoe contact on a wheel when brakes are applied, as recited in claim 25, consider the brake assembly of Mulcahy. In view of Mulcahy, it would have been obvious to one skilled in the art to provide a brake assembly, similar to that taught by Mulcahy, in the structure of Wike for providing appropriate braking when needed.

12. Claims 8-12, 14-17, 19-24 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
